Project name	A Crm Application for Banquet Hall Booking
Maximum marks	

Chapter – 2

Ideation Phase

2.1 Problem Statement:

In the current banquet hall booking process, manual systems dominate—relying on phone calls, physical visits, spreadsheets, and paper records. This leads to inefficiencies, such as:

- Double bookings due to lack of real-time availability tracking.
- Delayed responses to customer inquiries.
- Poor coordination between event services like catering, décor, and entertainment.
- Limited data insights for business decisions.
- Inconsistent customer experience and communication gaps.

These challenges result in lost revenue, customer dissatisfaction, and operational bottlenecks.

💡 Need for a Solution

To overcome these issues, a **cloud-based, automated system** is required that:

- Centralizes booking and service management.
- Provides real-time availability and scheduling.
- Integrates event services into a single platform.
- Automates notifications and approvals.
- Offers analytics for performance tracking.

A CRM APPLICATION FOR BANQUET HALL BOOKING

Salesforce, with its robust CRM and automation capabilities, is the ideal platform to build this solution.

2.2 Empathy Map Canvas

🧠 Empathy Map Canvas: “Event Organizer” Persona

Section	Insights
👁️ Sees	Ads for banquet halls, social media posts of events, online reviews
👂 Hears	Suggestions from friends, family, influencers, and past clients
🗣️ Says	“I want a hall that fits my budget and looks elegant.” “Can I customize the services?”
🧠 Thinks	“Will the venue be available on my date?” “Is the staff reliable?”
💖 Feels	Excited about the event, anxious about planning, worried about hidden costs
🏃 Does	Browses websites, compares packages, calls venues, reads reviews
😞 Pains	Confusing booking process, lack of transparency, delayed responses
🎯 Gains	Easy booking, clear pricing, responsive support, bundled services

2.3 Brainstroming

A CRM APPLICATION FOR BANQUET HALL BOOKING

💡 Feature Ideas

- Interactive Calendar View: Drag-and-drop bookings with color-coded availability.
- Dynamic Pricing Engine: Adjust rates based on season, demand, or event type.
- AI-Powered Suggestions: Recommend halls and services based on customer preferences.
- Multi-Hall Booking: Allow users to book multiple venues for large events.
- Vendor Ratings & Reviews: Let customers rate catering, décor, and entertainment services.
- Customizable Packages: Users can build their own event bundles with real-time pricing.
- Digital Contracts & E-Signatures: Secure agreements directly within the platform.

👤 Admin Tools

- Conflict Detection Alerts: Notify staff of overlapping bookings or resource clashes.
- Revenue Forecasting Dashboard: Predict income based on upcoming bookings.
- Staff Task Assignment: Link bookings to staff roles and responsibilities.
- Service Inventory Tracker: Monitor availability of décor items, catering supplies, etc.

🧩 User Experience Enhancements

- Mobile Booking Portal: Responsive design for on-the-go access.
- Live Chat Support: Real-time assistance during booking.
- Event Timeline Generator: Visual schedule of the event day with service timings.
- Guest RSVP Tracker: Customers can send invites and track responses.

🔧 Salesforce-Specific Ideas

- Experience Cloud Portal: Build a branded customer-facing site.
- Einstein Analytics: Use AI to uncover booking trends and customer behavior.
- Omni-Channel Integration: Connect bookings from WhatsApp, email, and web forms.
- Custom Lightning Components: Create sleek UI elements for booking and service selection.
