Project name	A Crm Application for Banquet Hall Booking
Maximum marks	

Chapter – 3

Requirement Analysis

3.1 Journey Map:

Customer Journey Map: “Event Organizer” Persona

Stage	Actions & Touchpoints	Emotions & Thoughts	Opportunities for Improvement
1. Awareness	Sees ads, hears recommendations, browses online for venues	Curious, hopeful, overwhelmed by choices	SEO optimization, targeted ads, clear branding
2. Consideration	Visits website/portal, compares packages, checks availability	Analytical, budget-conscious, seeking value	Interactive calendar, transparent pricing, service bundles
3. Booking	Fills inquiry form, selects hall/services, receives confirmation	Excited, anxious about details	Real-time availability, e-signature contracts, instant alerts
4. Preparation	Communicates with staff, finalizes services, receives reminders	Focused, stressed, wants everything perfect	Automated reminders, service checklist, live chat support
5. Event Day	Arrives at venue, interacts with staff, enjoys the event	Nervous, celebratory, attentive to guest experience	On-site coordinator, mobile event timeline, feedback prompts

A CRM APPLICATION FOR BANQUET HALL BOOKING

6. Post-Event	Shares feedback, receives thank-you message, considers rebooking	Reflective, satisfied (or not), loyal if impressed	Feedback form, loyalty offers, referral incentives
---------------	--	--	--

How Salesforce Supports This Journey

- Experience Cloud: Customer portal for booking and tracking
- Flows & Automation: Confirmations, reminders, and feedback requests
- Reports & Dashboards: Track customer satisfaction and repeat bookings
- Custom Objects: Manage each stage with tailored data models

3.2 Software Requirements

Layer	Technology / Tool	Purpose
Platform Core	Salesforce (Multitenant, Metadata-Driven)	Foundation for data model, security, APIs
Backend Logic	Apex (Triggers, Classes, Batch Jobs), SOQL/SOSL	Custom business logic and data processing
User Interface	Lightning Web Components (LWC), Aura, Experience Cloud	Responsive and portal UI for tenants/managers
Automation Tools	Flow Builder, Scheduled Flows, Approval Processes	Automate processes like renewals, reminders

3.3 Data Flow Diagrams

Core Salesforce Stack

Layer	Technology / Tool	Purpose
CRM Platform	Salesforce Lightning Experience	Core UI for users and admins
Data Modeling	Custom Objects, Fields, Relationships	Define entities like Halls, Bookings, Services, etc.
Automation	Flows, Process Builder, Apex Triggers	Automate booking approvals, notifications, validations
Security	Roles, Profiles, Sharing Rules	Control access and protect sensitive data

A CRM APPLICATION FOR BANQUET HALL BOOKING

Analytics	Reports & Dashboards	Visualize booking trends, revenue, and customer feedback
Integration	Email/SMS APIs, Webhooks	Send confirmations, reminders, and connect external apps
Portal	Experience Cloud	Customer-facing booking portal
Scheduling	Salesforce Scheduler	Manage time slots and hall availability
